🌐 Choose Your Language

Beginner-friendly courses sourced from top platforms (freeCodeCamp, CS50, Codecademy, The Odin Project)

🐍

Python

The most beginner-friendly language. Perfect for data science, automation & web development.

Beginner 105+ hrs

4.8K students

View Courses →

⚡

JavaScript

The language of the web. Build interactive websites, apps and backends with Node.js.

Beginner 90+ hrs

4.0K students

View Courses →

☕

Java

Industry-standard language used in enterprise software, Android, and backend systems.

Beginner 85+ hrs

2.4K students

View Courses →

⚙️

C++

High-performance language for game development, systems programming and competitive coding.

Beginner 80+ hrs

1.9K students

View Courses →

HTML/CSS

The foundation of every website. Learn to structure and style beautiful web pages.

Beginner 60+ hrs

5.2K students

View Courses →

SQL

Query and manage databases. Essential skill for data analysts and backend developers.

Beginner 50+ hrs

2.1K students

How It Works

Simple, structured, and effective

1

Pick a Language

Choose from Python, JavaScript, Java, C++, HTML/CSS or SQL — all beginner-friendly.

2

Watch & Practice

Follow structured video lessons and code along with hands-on exercises.

3

4

Take Quizzes

Test your knowledge after each module with auto-graded quizzes.

Get Certified

Complete the capstone project and earn your verified certificate.
